Remember to use your sunscreen!

- Skin cancer is the most common form of cancer in the United States. More than 3.5 million skin cancers in over two million people are diagnosed annually.¹
- Each year there are more new cases of skin cancer than the combined incidence of cancers of the breast, prostate, lung and colon.²
- One in five Americans will develop skin cancer in the course of a lifetime.³
- Over the past 31 years, more people have had skin cancer than all other cancers combined.⁴
- Nearly 800,000 Americans are living with a history of melanoma and 13 million are living with a history of nonmelanoma skin cancer, typically diagnosed as basal cell carcinoma or squamous cell carcinoma.⁵
